

## Visual guide reference to assist you!

To help you visualize the space you need, each mattress, teepee, and bed tray table combo measures approximately 90cm wide by 220cm long. If space is a bit tight, the breakfast tray can be placed directly on the mattress of each bed allowing you to save additional room.

For smaller spaces, the most efficient layout is to arrange two rows of teepees facing each other. Please remember to leave enough space in front of each teepee to allow guests easy and comfortable access.

If you're unsure about your available space, feel free to reach out with your room measurements. We haven't encountered a space we couldn't work with, and we're always excited to find creative solutions to ensure your guests are comfortable and well taken care of!
